SOFTWARE DEVELOPMENT ENGINEER | FULL STACK DEVELOPER

Software Development Engineer (SDE) at WebCraft IT and B.Tech Computer Science (IoT) graduate with hands-on experience in full-stack web development, RESTful APIs, database systems, and AI/ML applications. Previously an LLM Quality Analyst Intern at WebCraft IT. Proficient in Python, C++, JavaScript, React.js, Node.js, Express.js, SQL, and MySQL, with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, API integration, authentication, and problem solving.

TECHNICAL SKILLS

Programming: C++, C, Python, JavaScript
Data Structures & Algorithms: Arrays, Strings, Searching, Sorting, Trees, Recursion, Problem Solving
Web Development: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js
Backend & APIs: RESTful APIs, API Integration, JWT Authentication
Databases: MySQL, SQL
Software Engineering: Object-Oriented Programming (OOP), Debugging, Modular Development, Code Reviews
AI / ML & LLM: Machine Learning, Data Preprocessing, Feature Engineering, Anomaly Detection, LLM Evaluation, Prompt Engineering
Tools & Other: Git, GitHub, VS Code, IoT Systems, Arduino, Sensors

PROFESSIONAL EXPERIENCE

SDE Developer | WebCraft IT, Indore | Full-Time **SEP 2026 – PRESENT**

- Develop and maintain full-stack web application features using JavaScript, React.js, Node.js, Express.js, and RESTful APIs.
- Write clean, modular, and testable code using OOP and Data Structures & Algorithms principles; debug and resolve defects.
- Work with MySQL databases and SQL queries for data storage and retrieval; use Git and GitHub for version control.
- Collaborate with team members to analyze requirements, troubleshoot issues, and deliver assigned technical tasks.

LLM Quality Analyst Intern | WebCraft IT, Indore **MAY 2026 – SEP 2026**

- Evaluated Large Language Model (LLM) responses for accuracy, relevance, coherence, and instruction-following.
- Identified errors, hallucinations, and inconsistencies in model outputs using structured evaluation guidelines and prompt engineering.
- Documented quality findings and provided feedback to improve LLM response quality and data quality.

PROJECTS

AI Fraud Detection System | Python, Machine Learning, Data Processing **OCT 2025 – DEC 2025**

- Developed an AI-based fraud detection system to identify suspicious transaction patterns using Python and machine learning.
- Performed data preprocessing and feature engineering to prepare transaction data for model training and prediction.
- Implemented classification and anomaly-detection workflows and built data visualizations to analyze fraud trends.

Counsellor Web Dashboard | React.js, Node.js, REST APIs, JWT **AUG 2024 – NOV 2024**

- Developed a responsive full-stack web dashboard for managing user and counselling data.
- Integrated RESTful backend APIs with the React.js frontend and implemented JWT-based authentication to secure access.
- Designed reusable frontend components and an intuitive interface focused on efficient data management.

IoT-Based Smart Street Light Management System | Arduino, Sensors **MAY 2023 – JULY 2023**

- Developed an automated street-light system that adjusts lighting based on real-time environmental conditions.
- Integrated sensors and control logic for intelligent switching and remote monitoring, reducing power consumption.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (Specialization in IoT) **OCT 2022 – AUG 2026**
Indore Institute of Science & Technology (RGPV), Bhopal

Higher Secondary (Class XII), CBSE **JUNE 2021 – JULY 2022**
Pragya Girls School, Indore

CERTIFICATIONS

- Introduction to Cyber Security – Deloitte (2025)
- Introduction to Networks – Cisco (2024)
- Full Stack Web Development – Edureka (2024)
- IoT Foundation Certification – Infosys (2023)

ACHIEVEMENTS & ACTIVITIES

- Participated in Smart India Hackathon (SIH) 2024, developing IoT-based solutions in a multidisciplinary team.
- Presented a research paper on Cognitive IoT Applications at the IIST Research Conference (2023).
